

WF-300 Accessories

Product Overview

Wolf's extensive range of positioning, mounting and protection accessories, encompassing fixing kits, films and cable management, for the LinkEx™ LED Floodlight (WF-300) give workers more secure temporary installation solutions for lighting in hazardous area working environments.

Wolf's fixing kits give flexible and sturdy mounting and positioning options for temporary applications - putting the floodlight exactly where it is needed.

Fixing Kits

- **Magnet Kit** - With magnet pads grip to flat ferrous metal surfaces.
- **Scaffold Kit** - With pipe clamp to fit to standard scaffold poles.

Tripods

For standalone floodlight positioning, Wolf's tripods give a stable platform allowing a floodlight to be attached and used at a variety of heights and can be directed upwards illuminating the work area from the underside. The range of **Tripod Stands** available are lightweight, easily transportable, made from steel and will extend a lamp to a height of up to 3.2 metres and are ideal to maximise light area coverage for workers.

Films

Not only is the positioning and mounting of floodlights key to worker efficiency but also the protection of the lens from damage to ensure its longevity, in optimal condition, for repeat usage. Wolf floodlights are used regularly in blasting, jetting, coating and painting applications and are protected from residue build-up by the use of a **Protective Film**, easily replaced between uses to ensure the product is delivering maximum light output without obstructions.

For more robust protection, a **Protective Grille** made from stainless steel mesh mounted on the frame of the floodlight, can be easily attached and removed with four stainless steel clips and fixings.

Cable Management

Finally, to keep the working area free from potential trip hazards, cable can be managed using a **Magnet Cable Tidy** to elevate it from the ground along a ferrous metal surface.

Other...

If you require something different to suit a particular hazardous area need, whether a variation to our existing range or a totally new accessory for a unique application and environment, please contact us to discuss the development of a practical and safe accessory solution.

Technical Specification

Product Reference	Product Description	Notes
Fixing Kits		
WF-696	Magnet Fixing Kit	To mount one WF-300 Stainless steel mounting bar with 3 x magnets
WF-699	Scaffold Fixing Kit	To mount one WF-300
Protection		
WF-650/3	Protective Film	3 per pack
WF-515	Protective Grille	1 per pack 3mm Stainless Steel 25x25mm Mesh 353x275mm - 520g
Cable Management		
LX-692	Magnet Cable Tidy	1 per pack
